Glass, wire and five bends - a mirror stripped down to its essentials

The versatile WALL MIRROR

MOEBE has added a new mirror to their collection. WALL MIRROR is a versatile mirror - use it in any room such as the bathroom, hallway or living room. With its simplicity and focus on the glass, you can use the wall mirror wherever you see fit.

WALL MIRROR is a frameless held only by a lightweight brass or steel wireform. As with MOEBE's STANDING MIRROR, the wall mirror was designed by stripping it down to its essential elements. This way the mirror is kept simple, leaving the core function - the glass - to speak for itself.

"We wanted to design a wall mirror that would work in all settings and add a touch of elegance to any home. The simple construction of the wire only lightly touching the glass, is what makes the design simple and elegant. This allows people to play with the mirror in all kinds of settings".

WALL MIRROR only consists of two elements, glass and brass or steel wire. With just five bends the wire holds the glass in place. This is what makes the design feel light and transparent.
